VLIEGENTHART®- Antiskin LV100

Product description

Oxime based anti-skinning agent used in air-drying paints or inks.

The formation of skin through the exposure of a coating / ink to the atmosphere is undesirable. The loss of material and potential problems caused through contamination by skin particles can be easily avoided by the use of an anti-skinning agent.

Antiskin LV100 complex the primary driers cobalt, manganese and iron whilst minimizing the effect on the drying speed.

Use level

The normal range of addition is between 0.1 - 0.8% calculated on total formulation. This should only be considered as a guideline. The optimum addition rate will depend on the total formulation characteristics.

Handling and storage

Material can be stored safely at temperatures between -15°C and 40°C. Consult Material Safety Data Sheet for specific safety and handling information. Employ standard safe chemical handling procedures.

Shelf-life if stored in original unopened packaging under the mentioned conditions: 2 years

Typical Properties*

Antiskin LV100		
Appearance		Colourless Clear Liquid
Purity	%	99
Moisture	%	0.1
Flash Point	°C	69

* indicative values only, not specifications.

PACKAGING: Non-returnable 200L steel drums and 1000L IBC

The technical information and specifications contained in this data sheet are based on careful investigations and given to the best of our knowledge. Nevertheless circumstances under which the product is used in practice are subject to many variations. VLIEGENTHART BV cannot be held responsible for possible deviations.
